# GEFRAN SOLUZIONI

## DESIGNER AND MANUFACTURER OF AUTOMATION DEVICES AND ELECTRICAL PANELS

**Gefran Soluzioni** supplies industrial products, solutions, and services, with special emphasis on the plastic transformation sector.

**Gefran Soluzioni designs and manufactures** automation devices, electrical panels and control software for industrial processes.

**We provide machine builders and final users with expertise** and process control.

Our designers create the best and control solutions based on the customer's specific needs and type of application, using products by Gefran as well as by third parties.

Gefran Soluzioni offers its services primarily to the plastic and metal processing, metal sheet cutting, air and water treatment, and heat treatment markets.

# AUTOMATION SOLUTIONS AND ELECTRICAL PANELS

Gefran Soluzioni has been designing and manufacturing electrical panels for 50 years, offering its customers expertise and high quality.

## Services

- Panels mechanical **design**
- Electrical **design**, sizing and electrical diagrams
- Electrical panels **manufacturing**
- On board machine **wiring**
- **Inspection**, testing and safety checks
- **Commissioning** at the customer's facility

Gefran Soluzioni's objective has always been **to guarantee the quality of its products and services** by means of a quality management system conforming to **UNI EN ISO 9001** directives.

**Work and test processes** are based on constantly updated procedures that are followed in every step of panel design and production.

**All suppliers are carefully evaluated** and their products undergo performance and quality checks before use.

**Specialized personnel** conducts equipment, software inspections, tests and guarantee that every device is checked at the company and, if necessary, at the customer.

Along with technical documentation and manuals, all devices include **inspection and safety test reports and Declarations of Conformity**.

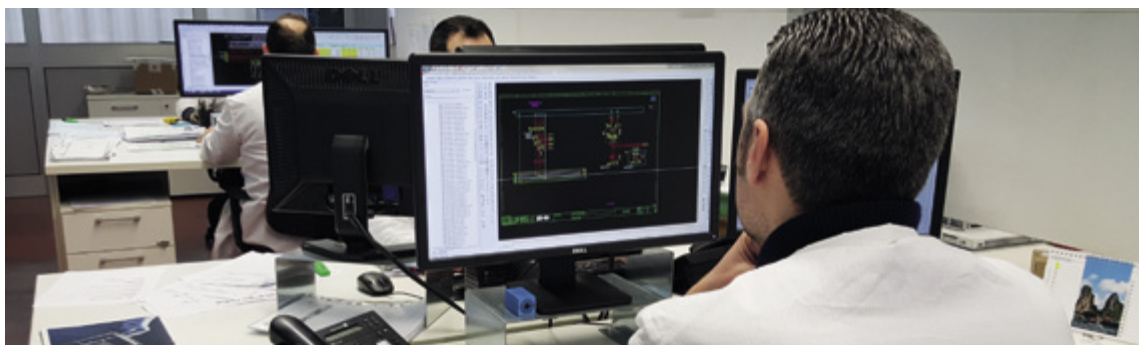

Gefran Soluzioni designs, manufactures and certifies devices **in conformity to international standards, including for the North American market** (United States and Canada) and is authorized to certify its products pursuant to UL 508 A standards.

## DESIGN AND SOFTWARE

Gefran Soluzioni collaborates with a team of process engineers to offer:

- **Drawing and Electrical diagrams design** with the most advanced software tools on the market: Eplan P8 and Pro Panel, Spac Automazione, Autocad.
- **2D and 3D mechanical design.**
- **Development of custom software applications** for the creation of HMI graphics and for process supervision and control.
- **Control and supervision** of plastic transformation machines by means of templates.
- Gefran platform's **software and hardware management.**
- Thirs-party platform's software and hardware management.

## SERVICES

**Gefran Soluzioni** completes its offer with services for builders and end users. Highly qualified engineers provide services in Italy and abroad.

These services provide:

- **A guarantee of continuity** for hardware and software solutions
- The **expertise** of a team of process engineers to assist each customer in the specifics of the application
- **Electrical-electronic revamping** of equipment.
